

Role Profile

Job Title: Maintenance Electrician/Technician

Department: Maintenance

Reports To: Maintenance Manager

Role Overview

Maintenance Electrician/Technician required for the maintenance of all Packhouse equipment including line support maintenance within a high volume production environment, with main duties as follows:

- Maintain health, safety and hygiene standards as a number one priority in accordance with company rules and regulations
- Electrical and mechanical trouble-shooting and repairs to high-speed, PLC-controlled plant, including slicing, filling, packaging equipment, pneumatic and hydraulic control systems
- Monitor line and machine performance. Work off your own initiative when a fault is detected and decide on action, based on your best judgment on whether to effect immediate repair or not
- Ensure that all equipment preventative maintenance is carried out both efficiently and safely
- Maintain accurate, up-to-date maintenance documentation, following good documentation practices and keep maintenance management updated on maintenance progress on site
- To keep clean any areas in which you are working, including any transit areas to and from the workshop, including the workshop and stores
- Update the maintenance management system (CMMS), records of all changes, stores transactions made and work carried out
- Support the production team in achieving targets
- To oversee and assist if required, with any third party contractors in carrying out their duties on our site as and when required
- Being part of a callout service at weekends, if required, and form part of a rotating shift pattern
- Co-operate and participate fully in training and development in cross-skilling and other job-related competencies

This is not an exhaustive list and is subject to change and amendment.
